

USAID
FROM THE AMERICAN PEOPLE

Since 1984, The Demographic and Health Surveys Program has provided technical assistance to more than 400 surveys in over 90 countries. The DHS Program has earned a worldwide reputation for collecting and disseminating accurate, nationally representative data on topics such as fertility, family planning, maternal and child health, gender, HIV/AIDS, malaria, nutrition, and environmental health. Health information is collected through interviews with women and men, as well as collection of biological samples to test for malaria, vitamin deficiencies, and many other health conditions.

The DHS Program implements Demographic and Health Surveys (DHS), AIDS Indicator Surveys (AIS), Malaria Indicator Surveys (MIS), and Service Provision Assessments (SPA).

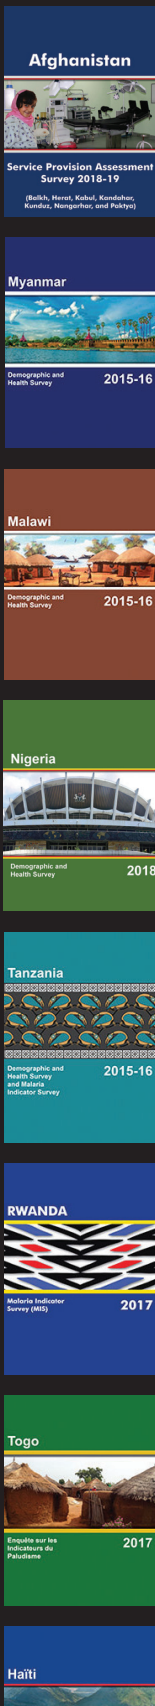

The DHS Program is implemented by ICF and partners Avenir Health, Blue Raster, EnCompass, The Johns Hopkins Bloomberg School of Public Health/Center for Communication Programs (JHUCCP), PATH, and Vysnova.

The DHS Program also provides:

Capacity Strengthening: The DHS Program builds local skills on all areas of survey design, implementation, and data analysis through on-the-job mentoring, classroom training, curriculum development, eLearning, and blended approaches.

Increased Access to and Use of DHS Results: The DHS Program makes survey results and datasets available through web-based tools, mobile apps, print materials, videos, media training, and organized workshops.

Data Analysis: A team of researchers and consultants for The DHS Program publishes new Analytical Reports, Comparative Studies, Methodological Reports, Spatial Analysis Reports, Qualitative Research Studies, and Occasional Papers.

Connect with us!

DHSprogram.com - The DHS Program's website provides free access to survey reports, data, and survey documentation.

STATcompiler.com - Compare data across countries and trends over time for hundreds of population, health, and nutrition indicators. Choose indicators for over 200 surveys and create customized tables, graphs, charts and maps.

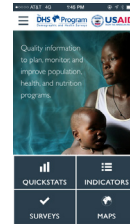

Mobile app - The DHS Program mobile app is available for free for Apple, Android, and Windows devices (search stores for DHS Program). Access key indicator data, maps, and basic survey information.

DHS User Forum - Need help with analysis or interpretation of DHS data? Visit the User Forum to search FAQs, post your own question, or join a conversation at userforum.dhsprogram.com.

Spatial Data Repository - The SDR provides geographically-linked health and demographic data from The DHS Program and U.S. Census Bureau for mapping in a geographic information system. Visit spatialdata.DHSprogram.com.

Learning Hub - The Learning Hub provides online learning resources to support capacity strengthening for survey implementing agencies and DHS data users. Visit learning.DHSprogram.com.

Social media - Follow us on Facebook, Twitter, LinkedIn, and YouTube for announcements, tips, new data, tutorial videos, and infographics. The DHS Program's blog provides an informal perspective on data collection and data use. Visit blog.DHSprogram.com.
