

Nepal

2022 Demographic and Health Survey

The 2022 Nepal Demographic and Health Survey (NDHS) is designed to provide data for monitoring the population and health situation in Nepal. The 2022 NDHS is the 6th Demographic and Health Survey conducted in Nepal since 1996.

Maternal and Newborn Health

4 in 5 women age 15-49 had 4+ antenatal care visits, as recommended.

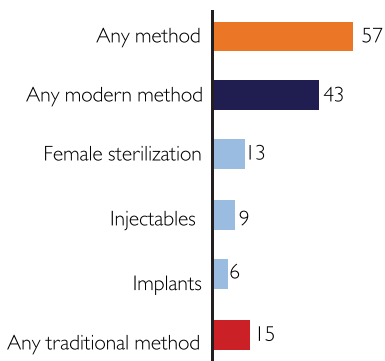

Nearly **4 in 5** live births were delivered in a health facility.

Family Planning

Family Planning

Percent of married women age 15-49 using family planning

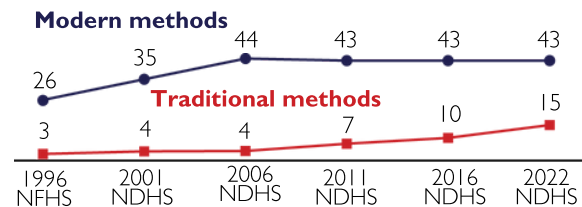

43% of married women age 15-49 use a modern method of family planning.

Modern method use has remained the same since 2011.

Trends in Family Planning Use

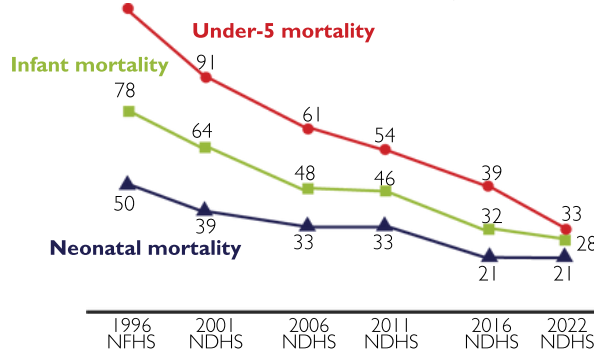

Percent of married women age 15-49 using family planning

Childhood Mortality

Trends in childhood mortality

Deaths per 1,000 live births for the 5-year period before the survey

Childhood mortality rates have dramatically declined between 1996 and 2022.

Currently, **1 in 30** children in Nepal does not survive to their 5th birthday.
