The Multiple Indicator and Health Survey (2015-16 IIMS) was implemented by the Angola National Institute of Statistics (INE), in direct collaboration with the Ministry of Health (MINSA) and the Ministry of Planning and Territorial Development (MPDT). INE coordinated the survey, with collaboration from MINSA and with technical assistance from United Nations Children’s Fund (UNICEF) and ICF, through the Demographic and Health Surveys Program, which provides support for population and health surveys in countries worldwide, and logistical support from the World Health Organization (WHO). The survey was funded by the United States Agency for International Development (USAID), through the President’s Malaria Initiative (PMI) and the President’s Emergency Plan for AIDS Relief (PEPFAR); the World Bank, through the Ministry of Health’s Municipalization Program; and the Government of Angola.

Additional information about The DHS Program may be obtained from ICF, 530 Gaither Road, Suite 500, Rockville, MD 20850, U.S.A. (Telephone: +1-301-407-6500; Fax: +1-301-407-6501; E-mail: info@DHSprogram.com; Internet: www.DHSprogram.com/ www.statcompiler.com).

8 in 10 women age 15-19 have heard of at least one method of family planning.

The 2015-16 Angola Multiple Indicator and Health Survey (2015-16 IIMS) provides data on marriage and sexual activity, fertility, and family planning among adolescents. The survey is based on a nationally representative sample. It provides estimates at the national level, for urban and rural areas and for the 18 provinces.

1 in 20 women age 15-19 had their first birth before age 15.

Women who are already mothers (had a live birth) + women who are pregnant for the first time = Women who have begun childbearing

Women who age 15-19 have no education.

12% of women age 15-19 had their first birth before age 15.

Teenage Childbearing by Age

Fertility among Adolescents
Percent of women age 15-19 who:

- Are already mothers
- Are pregnant for the first time
- Have begun childbearing

Teenage Childbearing by Residence
Percent of women age 15-19 who have begun childbearing

Teenage Childbearing by Education
Percent of women age 15-19 who have begun childbearing

Teenage Childbearing by Household Wealth
Percent of women age 15-19 who have begun childbearing
